Individual shipment pieces (package service) are only accepted up to a maximum weight of 20 kg.

- All packaging guidelines are waived if a pallet scheme has been agreed in advance with ZWILLING Beauty Group GmbH.
- Deliveries to our company must only be made on flawless, undamaged and exchangeable Euro pallets.
- The load must not protrude either in height or over the palette surface and must not be packed so that it slopes.
- The maximum weight of the load including the pallet must not exceed 700 kg.
- The loading height including the pallet must not exceed the maximum height of 1.95 m.
- All pallets must be wrapped in transparent film and additionally secured with plastic straps to avoid the goods tilting or slipping during transportation by HGV or during any materials handling processes. Please also note that no film edges or similar should jut out.
- For piece good shipments, in order to protect the goods, every package must be wrapped in plastic strapping bands in order to avoid unauthorised access.
- Every pallet and every other package must be delivered as single-product types and be furnished with a pallet slip (See example in Appendix 4). Here the number of packages should be kept as low as possible through efficient packing. However, as a rule the weight of each package may not exceed 20 kg.

Mixed pallets are only permitted if for quantity reasons a single-product type delivery is not economic.

Example: For delivery of 1 pallet with 3 different items, see Appendix 4. The same packaging units must contain equal quantities of individual items. If a packaging unit is created with a leftover quantity it must be must be furnished with a **Lower Quantity Sticker**.

- Small quantities can be consolidated into one packaging unit provided that each sub-packaging unit is labelled accordingly.

Each sub-packaging unit must be labelled with a contents list and the ZWILLING item number and number of pieces.

Example: Package contains 300 pieces of Item XXXXX-XXX-X, packaged in 25 smaller cartons each with 12 pieces. **The large package** must display:

Item Number XXXXX-XXX-X. Total number of pieces 300 consisting of 25x 12 pieces.

The **inner smaller boxes** must then be labelled with:

Item Number XXXXX-XXX-X Number of pieces 12.

- The pallet must be packed so that it can be easily counted from the outside. To do this the item numbers must be arranged so that they face outwards of the packaging.

5. Delivery Note and Labelling

A separate delivery note must be created for each delivery and attached in a delivery pouch on the outside of the goods.
